### SPECIFICATION PARAMETERS:

Product Name	Multifunctional Portable Energy Storage Power Supply
Battery Type	Ternary Lithium battery
Input Charging Power	CC/CV 15V/5A
AC Inverter Output	220V~50Hz 500W
DC Output	9V-12V / 13A MAX
USB Output	5V/2A
Total Power Output	500W
Size	415 x 270 x 280 mm
Weight	7800g
Working Environment Temperature	-20°C ~ 60°C
Working Environment Humidity	5% ~ 90%
Storage Temperature	-10°C ~ 55°C

Executive standard: GB 312241-2014 GB/T 18287-2000

## ELECSTOR - 499WH

500W Portable Power Station 135000mAh

### USER MANUAL

Thank you for choosing the  
**ELECSTOR - 500W**  
Portable Power Station 135000 mAh - 499WH  
Before operating this unit, please read the USER MANUAL carefully to get the most out of the device.

ALWAYS CHECK THE VOLTAGE, CURRENT AND POLARITY OF YOUR DEVICE IN ORDER TO SELECT THE CORRECT CORRESPONDING VOLTAGE WHEN CONNECTING TO THE UPS.

### Use the original power adapter to charge the product.

- Connect the original power adapter to the corresponding input port on the power station.
- Plug the power adapter into 220V plug-in port. The power indicator on the display screen of the power station will start to flash, which indicates that the device is charging.

### Charging your devices:

- Press the on/off switch to turn the 220V power supply on, the indicator light will turn on and the display screen will indicate the current power. Ensure that the power of your device does not exceed the power output of the power station.
- Connect your device to the relevant output port with its original charging cable to charge your device.

### Low Power Alarm:

- When the power level is less than 10%, the low power alarm will activate, and the display/light will start to flash. This will flicker until the device is out of power. If the device is not charged, the light will flicker for 5 seconds and then shut down.

### LED LIGHT:

- Press the LED button to turn the lighting function on, press the key again to turn the light off.
- Press and hold the button for 3 seconds to activate the SOS Rescue flashing function.

Executive standard: GB 312241-2014 GB/T 18287-2000

Please Make sure the total power consumption for all connected appliances is less than 500W before connecting the device to the AC port. If the power been drawn exceeds 500W, the power station will shut down and this could cause damage.

The device is advised to be used as a Power Station, not as an always-on, pass-through solution. It isn't advised to use the device while charging or to leave it constantly plugged in, as this can cause battery to deplete and lose lifespan.

## ELECSTOR - ECO SYSTEM

PERFECT FOR NETWORKING DEVICES AND FOR KEEPING YOUR PHONE CHARGED DURING AN OUTAGE

AVAILABLE IN 100W, 300W AND 500W PORTABLE POWER STATIONS

PERFECT FOR KEEPING THE LIGHTS ON DURING A POWER OUTAGE

### IMPORTANT INFORMATION:

- Before operating this device, please read the manual and operate the device according to the instructions provided.
- Please do not disassemble the device. This product is not equipped with any self-detachable or maintenance parts.
- Please keep this product out of contact from objects or heat sources that are above 55°C. Please keep this product out of reach of fire and water. Do not store this device in environments below 0°C.
- Please refrain from shaking, bumping or hitting the power station. If this power station encounters a hard bump, an extrusion or if the device is dropped from a height higher than 1 meter, and any damage or deformation occurs to the shell of the product, please refrain from use of the product.
- Do not place the product in the sun. Do not use chemical solutions to clean the product and keep it out of reach of any corrosive substances.
- When charging this device with a car charger, it recommended that your car be switched on for optimal charging.
- In the case of abnormal heating or liquid leakage, please stop using the device immediately. Should any liquid come into contact with your eyes, avoid rubbing your eyes and immediately rinse with water. Please contact a doctor immediately
- For this device to function optimally, it is recommended to only use original charging cables and adapters.
- Please dispose of this device safely and according to the national environmental protection regulations.

## WARNING

TOXIC & HARMFUL SUBSTANCES OR ELEMENTS

PART NAME:	LEAD (Pb)	MERCURY (Hg)	CADMIUM (Cd)	Hexavalent Chromium (Cr <sup>6+</sup> )	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ether (PBDE)
MAIN CONFIGURATION:	0	0	0	0	0	0
MACHINE PARTS	0	0	0	0	0	0

"0" means that the content of the hazardous and toxic substance in all homogeneous materials of the component is below the limit specified in GB/ t26572 standard.

"X" indicated that the content of the hazardous and toxic substance in the least one homogeneous material of the competent exceeds the limit specified in GB/ t26572 standard.

Note: The reason why this product is marked with "X" is that there is no alternative technology or component available at this stage.
